

SPIRIT OF
DRIVING

THE REVOLUTION BEGINS

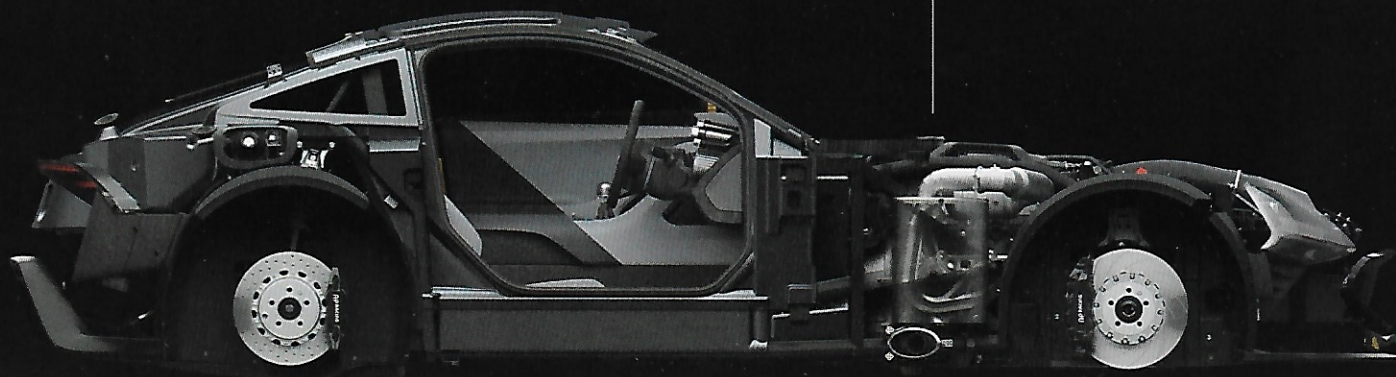

Inimitable TVR DNA can be felt in every inch of the new Griffith – in its machined metalwork, lightweight composite body, iStream® Carbon chassis. Preserving rarity whilst respecting an authentic past.

DEPENDABLE SIMPLICITY

The iStream® Carbon platform, created by Gordon Murray Design, delivers race car chassis performance with everyday usability.

EXPERIENCE PHYSICS

Feel the raucous potential of a Cosworth-tuned, 5.0 litre V8 engine, enhanced with a dry sump for a lower centre of gravity and best track performance.

MAKE A STAND AGAINST THE MUNDANE

The new TVR Griffith is hand-built with honest purpose, for those who want something truly authentic. A heart-thudding British sports car, conceived to reclaim everything that makes driving special.
