Witness the rebirth of a legend

Classic looks, thoroughly modern performance

CWR
titan

In 1967, a new car was unveiled at a small factory in Blackpool. This development of an already sporty Anglo American creation was a landmark design and laid the foundation of great things to come.

Now, more than 40 years later, a new chapter is added by CWR cars. The combination of timeless style, V8 muscle and modern technology has been brought together resulting in the ultimate drivers' car *re-born!*

CWR
